- MySQL

Experience

Fullstack developer - present

Chennai | AUG 2021

Pyramidions Solutions

Education

Bachelor of Computer Science Engineering

Arasu engineering College 2017-2021

Projects

Fullstack Setup

2024

The project includes ready-to-use bash scripts to streamline setup, database management, and testing. These scripts simplify the process, but if you're using an unsupported OS, you can execute the commands manually as outlined in the script files.

React Dev Custom Components

dev-reacts.web.app

2022

It's an open-source platform to build web apps faster with pre-built Hooks, Components, and Shared Logics coded by other developers. Components are independent and reusable bits of code.

Demo Crypto

democrypto-7f0f3.web.app

2022

Crypto trade practice platform to people learn about crypto different trading logics with coinbase realtime data from websocket

Book Donation

2021

React app to encourage people to donate books with Views and Hooks based structure

Course Certification

I have developed my skills through self-directed learning, including online resources such as YouTube.
